DETAILED ACTION

Allowable Subject Matter

1. Claims 1- 11 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in a combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1 and 11, for example, which include a rear end portion of cam groove is open at a rear end surface of cam ring to serve as accommodation section and cam follower is disengageable from front cam surface in cam groove against a biasing force of biasing device.
3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The closest prior art

Nomura et al (US 2002/0135889 A1) discloses a lens barrel includes a cam ring, which rotates about an optical axis while moving in the optical axis direction, and has a cam groove formed on an inner peripheral surface thereof.

Nomura et al (6839,187 B2) discloses a lens distance-varying mechanism for varying a distance between first and second lens group includes a first lens frame, a second lens frame rotatable relative to the first lens frame, a relative- moving mechanism for moving the first and second lens frame to change a relative position

therebetween on an optical axis when the second lens frame is positioned at each of forward and reverse rotation extremities thereof relative to the first lens frame.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
